

ABOUT US

OVERVIEW

75
YEARS OF
RESEARCH

A Halma plc company, Palintest has long been a leader in the supply of water analysis technologies, with a rich history of innovations and research.

OUR ROLE

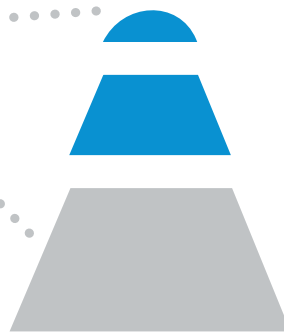

It is our goal to support global efforts in meeting the ever-increasing demands on water resources through the use of efficient monitoring and control technologies.

Q: WHY IS WATER QUALITY SO IMPORTANT?

2.5%
Fresh Water

97.5%
Saltwater

1%
Rivers & lakes

30%
Groundwater

69%
Glaciers

A: BECAUSE CLEAN WATER IS A VERY SCARCE RESOURCE

REGIONAL HUBS

USA • UK • Middle East • China • Australia

APPLICATION AREAS

DRINKING WATER

Parameters for treatment and supply

SWIMMING POOL & SPA

Kits for commercial and residential sectors

SOIL & IRRIGATION

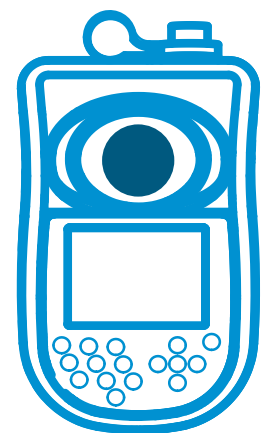

Test kits for optimising crop yields

PROCESS INDUSTRIES

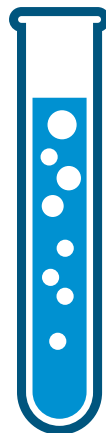

Test kits for industrial processes

INSTRUMENTATION

From multiparameter photometer kits with all calibrations pre-programmed into the software, to visual test kits allowing anyone to carry out analyses, Palintest has an instrument solution for every application.

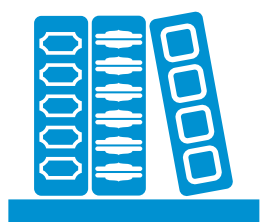

TEST METHODS

From the DPD test that Dr. Palin pioneered in the 1950s for measuring chlorine, Palintest now manufactures well over 100 reagent test methods to work on our instrument platforms.

Palintest methods are available in tablet and liquid formats and cover parameters from alkalinity to zinc.

WATER TESTING LIBRARY

Our online library contains research and insight surrounding our products and the applications they are used in.

THE HALMA PLC GROUP

50
BUSINESSES
23
COUNTRIES

Founded in 1894, Halma is an international collection of engineering and technology firms making products that help save lives and protect the environment..
